

OGHENECHUKO GODSWILL

AI Automation Engineer | AI Agents & Automation | Multi-Agent Systems | n8n | LangGraph | LangChain

Abuja, Nigeria | +234 708 953 3606 | godswillmamus54@gmail.com | godswillai.dev | github.com/godswillmamus54-max | linkedin.com/in/ogheneochuko-godswill

PROFESSIONAL SUMMARY

AI Automation Engineer focused on building intelligent agents, multi-agent workflows, and business automation systems. Hands-on with LangGraph, LangChain, OpenAI, n8n, Python, REST APIs, webhooks, Docker, AWS, and Linux. Builds practical systems for lead recovery, support triage, sales qualification, client onboarding, research, content operations, and workflow infrastructure, emphasizing structured outputs, validation, routing, testing, and reliable execution.

CORE TECHNICAL SKILLS

AI & Agents	LangGraph, LangChain, AI Agents, Multi-Agent Systems, OpenAI API, Tool Calling, MCP, Prompt Engineering
Automation	n8n, Workflow Automation, Business Process Automation, Webhooks, REST APIs, Structured Workflows
Programming	Python, JavaScript, TypeScript, Node.js, React, Next.js
Cloud & DevOps	AWS EC2, Docker, Docker Compose, Ubuntu, Nginx, Cloudflare, Git, GitHub
Data & Integrations	PostgreSQL, MySQL, SQLite, Google Sheets, Gmail, Slack, Google Drive, APIs

SELECTED PROJECTS

Multi-Agent Workflow with LangGraph — Planner → Worker → Reviewer architecture with explicit shared state, conditional routing, structured review decisions, feedback-driven revision, and bounded escalation. Python, LangGraph, LangChain, OpenAI.

Tool-Using Research Agent — Research agent using external search and page-fetching tools, evidence tracking, source-grounded answers, hard execution limits, citations, and graceful tool-failure handling. Python, LangGraph, LangChain, OpenAI.

RoofLead Rescue — AI lead-recovery automation combining normalization, deduplication, AI analysis, deterministic 0–100 scoring, recovery routing, personalized follow-up, PDF reporting, Google Drive, and email delivery.

AI Customer Support Triage & Escalation — n8n support automation validating and deduplicating requests, classifying category/priority/sentiment, routing urgency, escalating critical cases through Slack, and logging requests.

AI Lead Qualification & Routing — Sales automation validating and deduplicating leads, scoring buying intent 0–100, classifying Hot/Warm/Cold opportunities, alerting sales teams, and storing qualification data.

AI Client Onboarding & Project Setup — Workflow validating requests, using AI to assess requirements, creating onboarding tasks and client records, organizing project data, and sending Gmail/Slack notifications.

AI Content Factory — n8n/OpenAI content production workflow for articles, social content, AI images, and publishing operations.

AI Job Application Assistant — Automation analyzing job descriptions, generating tailored resumes and cover letters, organizing application data, and streamlining job applications.

Production n8n Server — Self-hosted n8n infrastructure using AWS, Docker, Ubuntu, Nginx, HTTPS, Cloudflare, backups, monitoring, and secure reverse-proxy configuration.

EXPERIENCE

AI Agents & Automation Engineer — AgenticX AI Labs | 2026 — Completed a practical AI Agents & Automation internship; built and passed human review for a Tool-Using Research Agent and a Multi-Agent Workflow with LangGraph.

Independent AI Automation & DevOps Projects | 2026–Present — Design and build AI-powered workflows with n8n, OpenAI, APIs, webhooks, structured data, validation gates, branching, routing logic, and external service integrations. Deploy automation infrastructure using AWS, Docker, Ubuntu, Nginx, Cloudflare, HTTPS, backups, and Git/GitHub.

Freelance Computer Support Technician — Degreat Computers | 2012–2014 — Provided technical support across system updates, software upgrades, troubleshooting, customer service, and hardware maintenance; supported IT students with practical training and project-defense preparation.

CERTIFICATIONS & EDUCATION

AI Agents & Automation Internship — AgenticX AI Labs (2026) | AI Automation & Workflow Engineering — AITECH Technologies (2026) | AI Prompt Engineering — AITECH Technologies (2026) | Emakpor High School — Secondary School Certificate (2011)
