PROFESSIONAL SUMMARY

AI Automation Engineer with hands-on experience designing workflow automation systems using n8n, AI agents, OpenAI, REST APIs, webhooks, JavaScript, Docker, AWS, Linux, and cloud infrastructure. Builds practical business automations for support triage, lead qualification and recovery, client onboarding, content operations, and job-application workflows, with emphasis on validation, structured outputs, routing logic, integrations, and production-oriented deployment.

TECHNICAL SKILLS

AI & Automation	n8n, AI Agents, OpenAI API, Workflow Automation, Prompt Engineering, REST APIs, Webhooks
Cloud & DevOps	AWS EC2, Docker, Docker Compose, Ubuntu, Nginx, Cloudflare, Git, GitHub
Programming	JavaScript, TypeScript, Python, Node.js, React, Next.js
Data & Integrations	PostgreSQL, SQLite, MySQL, Google Sheets, Gmail, Slack, Google Drive
Tools	VS Code, Postman, PowerShell, Linux

SELECTED PROJECTS

RoofLead Rescue - AI lead-recovery automation for roofing businesses combining lead normalization, deduplication, AI analysis, deterministic 0-100 scoring, recovery routing, validated follow-up strategy, PDF reporting, Google Drive storage, and email delivery.

AI Customer Support Triage & Escalation System - n8n support automation that validates and deduplicates requests, classifies category/priority/sentiment with structured AI output, routes Critical/High/Normal/Low cases, escalates urgent tickets through Slack, and logs processed requests.

AI Lead Qualification & Routing System - Sales automation that validates and deduplicates leads, scores buying intent from 0-100 with AI, classifies Hot/Warm/Cold opportunities, alerts sales teams, and stores qualification data in Google Sheets.

AI Client Onboarding & Project Setup System - Client onboarding workflow that validates requests, uses AI to assess requirements, creates onboarding tasks and client records, organizes project data, and sends automated Gmail/Slack notifications.

AI Content Factory - AI content generation and publishing workflow using n8n and OpenAI for articles, social content, AI images, and publishing operations.

AI Job Application Assistant - Automation that analyzes job descriptions, generates tailored resumes and cover letters, organizes application data, and streamlines job-application steps.

Production n8n Server - Self-hosted n8n infrastructure deployed with AWS, Docker, Ubuntu, Nginx, HTTPS, Cloudflare, backups, monitoring, and secure reverse-proxy configuration.

EXPERIENCE

Independent AI Automation & DevOps Projects | 2026-Present

Design and build AI-powered workflows with n8n, OpenAI, APIs, webhooks, structured data, validation gates, branching, routing logic, and external service integrations.

Deploy automation infrastructure using AWS, Docker, Ubuntu Linux, Nginx, Cloudflare, HTTPS, backups, and Git/GitHub.

Freelance Computer Support Technician - Degreat Computers | 2012-2014

Provided technical support across system updates, software upgrades, troubleshooting, customer service, and hardware maintenance; supported IT students with practical training and project-defense preparation.

CERTIFICATIONS & EDUCATION

AI Automation & Workflow Engineering - AITECH Technologies (2026)

AI Prompt Engineering - AITECH Technologies (2026)

Emakpor High School - Secondary School Certificate (2011)
