

OGHENECHUKO GODSWILL

AI Automation Engineer | n8n Developer | AI Agent & Workflow Automation

Abuja, Nigeria | +234 708 953 3606 | godswillmamus54@gmail.com

Portfolio: <https://godswill.dev> | **GitHub:** github.com/godswillmamus54-max | **LinkedIn:** linkedin.com/in/ogheneochuko-godswill/

PROFESSIONAL SUMMARY

AI Automation Engineer specializing in **n8n workflow automation, AI agents, API integrations, and production automation systems**. Experienced in designing end-to-end workflows that connect AI models, APIs, webhooks, cloud infrastructure, databases, and business applications. Hands-on experience building AI-powered systems for job discovery and application assistance, automated content production, workflow orchestration, and operational automation. Skilled with n8n, OpenAI, JavaScript, Python, REST APIs, Docker, AWS EC2, Linux, Git/GitHub, Google Sheets, Gmail, React, and Next.js.

TECHNICAL SKILLS

AI & Automation: n8n • AI Agents • OpenAI API • Prompt Engineering • Workflow Automation • AI Automation • LLM Integration

APIs & Integrations: REST APIs • Webhooks • HTTP Requests • API Authentication • Service Integration • JSON • Structured Data

Programming: JavaScript • Python • TypeScript • Node.js

Cloud & DevOps: AWS EC2 • Docker • Docker Compose • Ubuntu/Linux • Nginx • Cloudflare • HTTPS • Git • GitHub

Web Development: React • Next.js • HTML • CSS • Responsive Web Development

Data & Storage: Google Sheets • PostgreSQL • MySQL • SQLite • Structured JSON Data

SELECTED PROJECTS

AI Job Application Assistant

n8n • OpenAI • JavaScript • Arbeitnow API • Google Sheets • Gmail

- Integrated the Arbeitnow API to automatically discover job opportunities.
- Built JavaScript processing for job normalization, role filtering, skill matching, and relevance scoring.
- Implemented AI-powered job analysis producing structured match scores, matched skills, missing skills, and reasoning.
- Added conditional application routing based on job-match quality.
- Built specialized AI workflows for job-specific cover letters and ATS-optimized resumes.
- Designed application-data assembly combining original job data, AI analysis, cover letter, and resume.
- Integrated Google Sheets for application tracking and Gmail for job-match notifications.

AI Content Factory

n8n • OpenAI • Docker • APIs • Google Sheets • AI Media Generation

- Built an AI-powered content automation platform for digital content production and distribution.
- Designed automated AI content-generation workflows using n8n and OpenAI.
- Connected workflow stages for content creation, processing, and distribution.
- Integrated APIs and HTTP-based services into automated pipelines.
- Applied structured data handling between generation and publishing stages.

Production n8n Automation Infrastructure

AWS EC2 • Docker • Docker Compose • Nginx • Cloudflare • Ubuntu/Linux

- Deployed n8n on AWS EC2 using Docker and Docker Compose.
- Configured Nginx as a reverse proxy and implemented HTTPS and Cloudflare-based traffic management.
- Configured Linux/Ubuntu server environments for automation workloads.
- Implemented automated backup processes and basic operational practices.
- Used Git/GitHub for source control and workflow development.

Daily AI Briefing Assistant

n8n • AI Agents • APIs • Google Sheets • HTTP

- Built an automated daily briefing workflow combining external data sources with AI-generated information.
- Integrated APIs for weather and exchange-rate information and generated structured daily insights.
- Implemented conditional workflow logic and structured JSON output.
- Stored generated reports in Google Sheets and designed automated HTTP-based delivery.

Personal Portfolio Website

React • Next.js • TypeScript

- Built and deployed a responsive technical portfolio showcasing automation, AI, DevOps, and software projects.
- Structured project content around technical capabilities and real-world automation work.
- Published the portfolio at godswill.dev and integrated GitHub and professional-profile links.

Online Banking Demo

React / Web Development

- Built a responsive online banking demonstration interface as a development project.
- Designed a modern banking dashboard interface and frontend components for common banking workflows.
- Developed the project as a demonstration rather than a production financial system.

PROJECT / PRACTICAL EXPERIENCE

AI Automation & DevOps Projects | 2026 – Present

- Design and build AI-powered automation systems using n8n and OpenAI.
- Develop multi-stage workflows combining AI agents, APIs, webhooks, JavaScript, and business applications.
- Build structured data pipelines for reliable communication between automation stages.
- Deploy automation infrastructure using Docker, AWS EC2, Ubuntu/Linux, Nginx, and Cloudflare.
- Develop API integrations using REST APIs, HTTP requests, JSON, and webhooks.
- Use Git and GitHub for version control, documentation, and portfolio development.
- Apply workflow testing, debugging, error handling, and data validation to automation systems.

Freelance Computer Support Technician | Degreat Computers | 2012 – 2014

- Installed and configured operating systems and business software.
- Diagnosed and resolved hardware and software problems.
- Provided technical support and maintenance to clients.

CERTIFICATIONS

- AI Automation & Workflow Engineering — AITECH Technologies, 2026
- AI Prompt Engineering — AITECH Technologies, 2026

EDUCATION

Emakpor High School — Secondary School Certificate, 2011
